

BullDog Pro Water Blasters

What's Different about BullDogPRO cold - Diesel water-blasters ?

Powered By:

Overhead valve, water-cooled Diesel engine by **Daihatsu- Vanguard** Industrial. The latest in design, and are much **quieter**, run cooler, and **uses less fuel** than older designs by other manufacturers. Includes throttle for easy pressure control, low oil shutdown, full pressure lubrication and, oil filter for durability.

The Pump:

Annovi Reverberi brand; solid ceramic plunger pump with all the highest quality components including **forged bronze rods**, stainless steel valves, oversize bearings and solid bronze head with 1/2" fpt inlet ports. Each pump is matched to the high efficiency, **volume matched** unloader valve and **regulator style relief** with stainless ball & seat for efficiency and safety. A **high volume bypass system** (or, bypass to tank on tank-feed models) solves the bypass overheat problems of most pumps. The much slower heat up time allows the thermal relief valve to open exactly at the rated 140° F protecting the pump.

More Features:

Downstream chemical injection is acid resistant and comes with quick couplers.

High pressure hose is 50'ft double wire braid or better, with quick couplers.

Trigger gun is rear entry style with steel tail connections and quick couplers.

Spray wand is 5000 PSI rated steel and zinc plated, or 6000 PSI stainless... or better.

Spray nozzles are quick connect style stainless steel with plastic protectors.

Frame is .120" wall steel, sandblasted, zinc and hi-temp powder coated.

Recommended Options:

Low water shutdown system...Kills engine with low water pressure/volume.

Bypass temperature limit shutdown...Kills engine with bypass @ 140° F.

"Turbo Nozzle" spray intensifier...Exponentially increases force of water coming from the nozzle which dramatically increases cleaning power.

There are so many **things to know** about this kind of equipment, you really should call or e-mail us so we can quantify your **exact needs**, answer **ALL** the questions which will at least **save you money**, and get you directly to **"long term low cost"** where YOU **KNOW** you **WANT** to **BE !!!** besides... **it's the fun part of our jobs.**

Thanks for considering our equipment.
