

# BullDog Pro Water Blasters

## What's Different about BullDogPRO HOT Water Blasters?

### Powered By:

Overhead valve DIESEL engine by **Daihatsu-Vanguard** Industrial. The latest design, is much **quieter**, **cooler**, and has the **BEST output Horsepower**, and **BEST reliability** in it's weight class. It includes throttle for easy water-flow control, **low oil** shutdown, and **over-temp** shutdown. We add the **easy access** controls, vibration isolation system, and personalized warranty.

### The Pump:

**Annovi Reverberi** brand... highest rated, solid ceramic plunger pump with all the highest quality components including **forged bronze rods**, stainless steel valves, oversize bearings and solid bronze head with 1/2" fpt inlet ports. Each pump is matched to the high efficiency, **volume matched** unloader valve and regulator style relief with **stainless** ball & seat for efficiency and safety. Our **High volume bypass system** solves the bypass overheat problems of most pumps. The cooler bypass temperatures **greatly increase longevity AND reliability** of all the seals in the system.

### The Heater:

Cold water wrap, vertical style construction with 1/2" schedule 80 steel pipe (**rated 5000 PSI**) with a 210°F temperature control at the water **outlet**, and an additional 140°F temperature control and regulating relief valve at heater **inlet** for maximum safety control. Diesel burner is a **Beckett 12 volt** DC version with **ATO fuses** on control circuit wiring. Heater systems also come with **70 amp** control relay, **fuel pressure** gauge, **flow switch** flame control, **cleanable element**, fuel filter-water separator and the "quick-coupled" 5 gallon fuel cells are removable for convenience & cleaning.

### More Features:

**Downstream chemical injection** is acid resistant and comes with easy attach and removal quick couplers.

**High pressure hose** is 50 ft double wire braid with quick couple attachment.

**Trigger gun** is rear entry style with steel tail connections and quick couplers.

**Spray wand** is 4000 PSI rated steel and zinc plated, or 6000 PSI stainless.

**Spray nozzles** are quick connect style stainless steel with plastic protectors.

**Frame** is .120" wall steel, sandblasted, zinc and hi-temp powder coated.

### Recommended Options:

**Low water shutdown system**...Kills engine with low water pressure/volume.

**Bypass temperature limit shutdown**...Kills engine with bypass @ 140° F.

**"Turbo Nozzle"** spray intensifier...Impressively increases force of water coming from the nozzle which dramatically increases cleaning effect.

We "strategically manufacture" the very **BEST** in the industry, so once it's sold, we can **easily** back it up "old-school"... no matter where you are, you'll feel like a neighbor.

**BullDogPRO** water blasters are another quality product mfr. by...
